To the Citizens of Kankakee County

The Kankakee County Health Department believes it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain, and promote the bio-psycho-social health and well being of the community, and provide a safe and healthy environment. We are pleased to present this report which summarizes those services provided during the past year, as well as a summary of the occurrence of specific reportable communicable diseases.

In the year ahead, the Health Department will continue our efforts to prevent the spread of disease, ensure the safety of food and water, promote the health of children and adults, and protect the natural environment. We continue to assess the needs of the community and work in collaboration with other local partners to meet the needs identified. Working together as part of the Partnership for Healthy Community, five work groups are formulating strategies and taking action on the issues of mental health, access to care, risk factors for chronic disease, violence and substance abuse, and education and workforce development. Health department staff and others from the local hospitals, educators, and other social service agencies have developed plans and taken action to address these issues and improve the health status our county residents. Information on this work is available on our website. It is only through combined efforts, such as this, that we can realize our public health goals to protect the health of our citizens.

The Board of Health and the Kankakee County Health Department and its employees are proud to be able to serve you and to work together to promote Healthy People in Healthy Communities.

Bonnie Schaafsma, RN, BSN, MBA
Public Health Administrator

The Kankakee County Health Department believes that it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain, and promote the bio-psycho-social health and well-being of the community, and provide a safe and healthy environment. The department continually assesses the health needs and resources available, promotes development of appropriate needed programs and assures that quality services are acceptable, available, accessible and accountable. These services are delivered in a manner that respects individual/community dignity, values and rights as well as standards established on the federal, state and local levels.

Mission Statement adopted by the Kankakee Board of Health March 6, 1995
