To the Citizens of Kankakee County,

As the Administrator for the Kankakee County Health Department, I am honored to be able to continue to work with the Board of Health, the staff of the Health Department, and the community to promote public health in Kankakee County. We at the Health Department are pleased to present this report which summarizes our services provided during the past year, as well as a summary of the occurrence of specific reportable communicable diseases.

The Health Department continues to utilize many grant funds from the Illinois Department of Public Health and the Department of Human Services to meet the needs of our communities. In 2017, the Department received a new grant for Opioid Overdose and Prevention. The grant’s purpose is to reduce the number of prescription drug and opioid related deaths by implementing strategies designed to prevent opioid related deaths of those 18 years old and older. Some of the grant deliverables include Naloxone training for bystanders and first responders, purchasing and delivering FDA approved Naloxone, and conducting outreach and educational activities.

In the year ahead, the Health Department will continue our efforts to prevent the spread of disease, insure the safety of food and water, promote the health of children and adults, and protect the natural environment. We continue to assess the needs of the community and work in collaboration with other partners to meet the needs identified. We also continue to work with our partners in emergency management and response to be sure Kankakee County is prepared to deal with emergencies of all types, including such things as the threat from Seoul Virus, West Nile Virus, and other emerging threats. Through combined efforts we can realize our public health goals to protect the health of our citizens.

The Board of Health, the Kankakee County Health Department and its employees are proud to be able to serve you and to work together to promote healthier people in our community.

John Bevis, B.S., M.P.H.

Public Health Administrator

The Kankakee County Health Department believes that it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain, and promote the bio-psycho-social health and well-being of the community, and provide a safe and healthy environment. The department continually assesses the health needs and resources available, promotes development of appropriate needed programs and assures that quality services are acceptable, available, accessible and accountable. These services are delivered in a manner that respects individual/community dignity, values and rights as well as standards established on the federal, state and local levels.

Mission Statement adopted by the Kankakee Board of Health March 6, 1995
