

Kankakee County Health Department Annual Report 2006

To the Citizens of Kankakee County

The Kankakee County Health Department believes it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain and promote the bio-psycho-social health and well being of the community, and provide a safe and healthy environment. We are pleased to present this report which summarizes those services provided during the past year, as well as a summary of the occurrence of specific reportable communicable diseases.

In the year ahead, the Health Department will continue our efforts to prevent the spread of disease, ensure the safety of food and water, promote the health of children and adults, and protect the natural environment. In order to accomplish our mission, we will continue to work together, as we have during this past year, with other community health professionals, health care facilities, schools, local and state officials, and our citizens. It is only through the combined efforts of us all that these goals can be realized.

The Board of Health and the Kankakee County Health Department and its employees are proud to be able to serve you and to work together to promote **Healthy People in Healthy Communities**.

Preliminary data from: Illinois Department of Public Health

The Kankakee County Health Department believes that it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain and promote the bio-psycho-social health and well-being of the community, and provide a safe and healthy environment. The department continually assesses the health needs and resources available, promotes development of appropriate needed programs and assures that quality services are acceptable, available, accessible and accountable. These services are delivered in a manner that respects individual/community dignity, values and rights as well as standards established on the federal, state and local levels.
