**Outbreak-associated cases are linked to a congregate setting or large gathering

In Kankakee County, there are 13 additional confirmed case of coronavirus disease 2019 (COVID-19) since our last update. In Kankakee County, there are now 213 confirmed cases of COVID-19, including 119 from a Long-Term Care Facility (LTCF). Kankakee County has 11 COVID-19 related deaths and 25 recoveries.

KCHD reminds everyone that nursing homes, assisted living facilities and other long-term care facilities have the highest risk populations due to their age and underlying medical conditions.

KCHD continues to discourage testing for individuals who are mildly or not sick at all even if you think you have had contact with a COVID-19 confirmed positive case. If you are sick, please stay home except to get medical care.

We continue to ask the community to take the necessary steps to keep yourself, your family, and your community safe. Continue to follow social distancing recommendations, “Stay at Home” procedures and other safety measures which include:

- Staying home as much as possible,
- Calling to check on family, neighbors, and older adults instead of visiting,
- Checking with your provider about telehealth options if you feel ill,
- Continuing to use proper hand hygiene,
- Covering your nose and mouth with a tissue or sleeve when sneezing or coughing.

Most importantly stay home if you are sick! Avoid the Emergency Department and other places you seek healthcare if you are not severely ill, unless your doctor advises otherwise. Stay home and keep healthcare access available for others with more severe illness.

For general questions about COVID-19 visit our website at www.kankakeehealth.org or contact the IDPH COVID-19 hotline at 1-800-889-3931 | email dph.sick@illinois.gov.
